

Dr. Thomas T. Jeneby Opens San Antonio's Most Upscale Cosmetic Center

[BY: MARIO OCHOA]

Doctors are renowned for their expertise and skill, but rarely are they lauded for their ability to host patients in environments that are warm, contemporary and welcoming.

With the recent opening of his new office at 7272 Wurzbach Rd., Building 8, Unit 820, Dr. Thomas Jeneby is bucking the trend and offering patients an opportunity to receive the highest level of care in a medical space that is reminiscent of posh New York, Los Angeles and Chicago digs.

Dr. Jeneby, a Board Certified Plastic Surgeon, explained that not only is his new facility tailored for his important clients, it also offers several advantages over its predecessor. "This new space will offer patients an on-site surgical suite," he says. "This will allow us to perform many procedures in-house, such as Smart Lipo Laser Suction and Mini Facelifts. The Mini Facelifts, in particular, can be done in about two and a half hours. This helps greatly reduce a patient's downtime. This helps them get back to their life faster."

Of course, Dr. Jeneby and his team worked tirelessly over the past several months to make this level of efficiency possible. As he noted, after spending three years at his previous downtown location, it made sense to move closer to the Medical Center. The end result is a spa-like atmosphere that has new and old clients singing its praises. "Oh, the response has been tremendous," says Dr. Jeneby. "We are getting a lot

of compliments from our longtime patients about how upscale the new office is. It really has surprised people who are not used to this type of atmosphere in San Antonio."

Older patients and newcomers can rest assured that Dr. Jeneby will continue to provide an array of options, including, SmartLipo, Abdominoplasty, Adjustable Breast Implants, Breast Augmentation, Breast Reduction, Brow Lift, Facelift, Rhinoplasty, Liposuction, Lip Augmentation and Otoplasty. "Our client options will not change," Dr. Jeneby remarked. "This space will actually help our patients be more comfortable when they come in for a procedure." In addition, Dr. Jeneby is a specialist beginning to specialize in adjustable breast implants for women, in an effort to further expand allowing customization of size without going back to the operating room; he is also the second Plastic Surgeon in Texas to bring Laser Liposuction to Texas.

Dr. Jeneby and his staff at The Plastic and Cosmetic Center of South Texas also welcome anyone interested in visiting his office to view its "ultra-modern and contemporary" design. "We would like to invite people to come by and visit the offices and see the exciting things that are happening." **N**
